INFORMATION UPDATE

TO:	Mayor and Members of City Council
DATE:	December 3, 2018
SUBJECT/REPORT NO:	Trust & Confidence Report Update – Availability of new Ward Profiles
WARD(S) AFFECTED:	City Wide
SUBMITTED BY:	John Hertel Director, Strategic Partnerships & Communications
SIGNATURE:	

The Trust & Confidence Report was created to highlight information about the City as it relates to who we are, what we do and how we do it. Since its release (December 2017), the Trust & Confidence Report has been reviewed quarterly, with updates provided as required. The most recent update includes the addition of new ward profiles, including ward features, assets and various indicators of socio-demographic characteristics.

To enable an agile approach to delivery, the full Trust & Confidence Report is available digitally rather than print, on the City's website at www.hamilton.ca/trustandconfidence.

The Ward Profiles can be accessed directly at <http://open.hamilton.ca/pages/wardprofiles>.

The next quarterly update of the Trust & Confidence Report, including updates to the service profiles, will be in January 2019, with updated information linking into the City's 2019 budget process, where applicable.

City of Hamilton Ward Profiles

The City of Hamilton Ward Profiles provides an overview of geographical features, assets and socio-demographics of each Ward and its residents. The indicators provided are a compilation of the most recent available data provided by the City of Hamilton:

- Health and Safe Communities Department, Children's Services and Neighbourhood Development Division
- Health and Safe Communities Department, Epidemiology and Evaluation Division
- Planning and Economic Development Department, Community Planning & Design Division

All data and indicators are based on the City of Hamilton ward boundaries that came into effect in November 2018. Due to the new ward boundaries, data previously collected based on the old boundaries could not be used to provide ward change over time analysis. The data and indicators will be refreshed as updates to data sources become available. The frequency data is updated varies significantly between data sources and may be as frequent as monthly or as infrequently as once every five or ten years.
